

Hamilton Street Bridge Project

Out-of-hours Works and Noise

4-7 June, Sundays and Weekend Shutdown

Update

Work to replace the Hamilton Street Bridge is well progressed with completed activities including:

1. Bridge demolition works
2. Sheet piling – to stabilise the embankment on both sides of the new bridge location, and
3. Pile installation on the north and south side.

Out-of-hours and noisy works

During June we will need to undertake pile testing, night and Sunday (daytime) works to prepare for the bridge beam installation at the end of June.

Pile testing between 7am and 7pm on:

- Tuesday 4 June
- Wednesday 5 June

Night works between 8pm and 5am on:

- Tuesday 4 June
- Thursday 6 June

Sunday works (if required) will be between 8am and 5pm on:

- Sundays 16 June and 23 June

Adjacent residents are advised that the night works on 4 and 6 June will be noisy as they include breaking up remaining sections of concrete from the old bridge close to the railway line.

For safety reasons, this work cannot start until railway services stop overnight. Therefore, work times are between 12 midnight and 3am.

Please visit www.transperth.wa.gov.au for information about train timetables.

Noise management

During these works there will be increased worker activity on and around the project site as well as material loading, and trucks entering and exiting the work area. You may also hear concrete cutting and breaking. We will make every effort to minimise noise as much as possible.

Sunday works will be less noisy with work activities limited to machinery movements and concreting and form work installation.

These works are required to prepare for the bridge beam lifts that will occur over the railway line. These works will be undertaken around the clock, from 7pm Friday 28 June to 5am Monday 1 July. Further details about the bridge beam activities will be circulated in mid-June.

Further information

Main Roads would like to thank residents and road users for their patience during the bridge replacement project.

During night and Sunday works please contact project manager Derek Obeng on 0438 198 652.

You may subscribe for construction email updates on the Hamilton Street Bridge Replacement project web page at www.mainroads.wa.gov.au For all other enquiries please contact our 24 hour Customer Information Centre on 138 138 or email enquiries@mainroads.wa.gov.au
