Night works and changes to road conditions on Mitchell Freeway southbound from 25 November 2018.

The Mitchell Freeway Southbound Widening project will see an additional 7 km of lane added to Mitchell Freeway southbound from Cedric Street to Vincent Street. Upcoming night works are required to realign the freeway’s southbound carriageway between Hutton Street and Powis Street. Activities will include the removal of existing line marking, and the installation of new line marking and temporary barriers. The works are being undertaken at night to ensure the safety of workers and road users.

Night works on Mitchell Freeway southbound between Hutton Street and Powis Street:

- Sunday 25 November to Thursday 13 December, 7.30pm to 4am
- Multiple lane closures and speed reduction to 60km/h.
- Intermittent closures of Hutton Street on-ramp with controlled stop-and-go traffic management in place from Monday 26 November to Thursday 29 November.

Changes to road conditions

Mitchell Freeway southbound between Hutton Street and Powis Street:

- A lateral lane shift to the temporary new alignment is expected to be in place by Friday 30 November.
- All lanes will remain open during daytime hours at a reduced speed of 80km/h.

Left lane after Cedric Street on-ramp:

- The left lane after Cedric Street will exit at the Hutton Street off-ramp, as opposed to merging at the Hutton Street bridge. Road users entering the freeway from Cedric Street will need to change lanes before the Hutton off-ramp to continue on the freeway. This change will improve traffic flow through the project area.
- From Tuesday 27 November to end of 2019 (completion of project).

During the works, the speed limit will be reduced to 80km/h. All construction speed limits are enforceable.
