

# Beating Congestion on Wanneroo Road

On 7 May 2017, the State and Commonwealth Governments announced a \$2.3billion package of road and rail infrastructure works, which will reduce congestion and lead to smarter, safer and more efficient journeys around our suburbs.

As part of this package, three new road projects will be constructed in Perth's north eastern corridor over the coming years. These complementary projects remove bottlenecks from Wanneroo Road, leading to safer and more efficient journeys and providing an improved alternative north-south route to the Mitchell Freeway.

## Managing construction impacts

The timing and delivery of each project will be carefully managed by Main Roads to minimise disruption to our road network, particularly on Wanneroo Road. Advanced notification of all works will be provided to local residents and road users whenever possible.

## Community engagement

Main Roads is committed to working closely with the community through the development and delivery of each project. Our community engagement teams on each respective project will engage directly with local residents, business owners, amenity groups and landowners to ensure any concerns are identified and appropriately managed.

In addition, the local community will be able to access timely project information in a range of ways – through newsletters, dedicated webpages, community reference groups and information sessions.

### Wanneroo Road Upgrade, Joondalup Drive to Flynn Drive

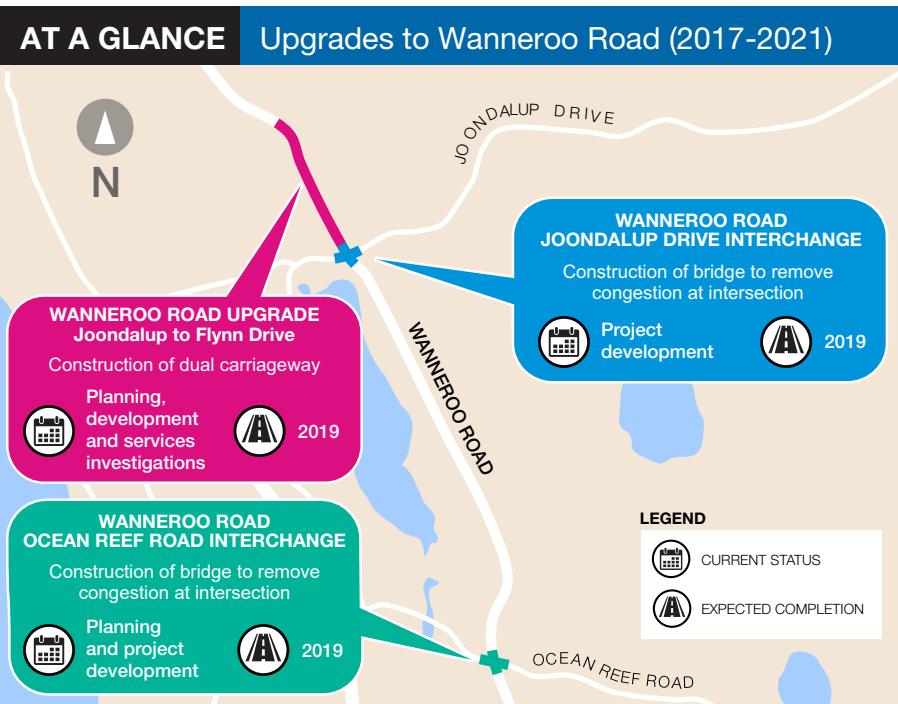

Convert the existing single-lane road to a dual carriageway over 3.2 km in each direction to remove a pinch point on Wanneroo Road, reduce travel times, provide an improved north-south alternative to Mitchell Freeway and enhance access to the Wangara and Neerabup industrial parks.

### Wanneroo Road / Joondalup Drive Interchange

A grade separation with Joondalup Drive passing over Wanneroo Road will remove congestion at the sixth most congested intersection in the Metropolitan area and significantly reduce journey times for road users

### Wanneroo Road / Ocean Reef Road Interchange

A grade separation with Wanneroo Road passing over Ocean Reef Road will address congestion at the seventh most congested intersection in the Metropolitan area, providing major safety benefits and supporting the growth of future traffic volumes.
